Software Engineer

Professional Summary

Full-stack web developer with over +4 years of experience designing and deploying scalable web applications using React, Next.js, Angular, and Node.js (NestJS). Skilled in building and integrating RESTful and GraphQL APIs, with strong expertise in Docker and Linux environments for containerization and deployment. Good knowledge of AWS services for application devops. Proven ability to optimize performance, develop reusable components, and deliver secure, high-quality solutions in agile environments. Bilingual in English and French, with a strong focus on collaboration and problem-solving.

Related Employment History

FullStack Web Developer

Since Feb 2023

Zenidata, Quebec/Canada

- Developed **Scriptogate** – An application for extracting actionable data from important documents (eg: invoices)
- Design and Built **Learndispo** – A platform that enables students to generate quizzes from their class notes.
